History and Interpretation is a collection of seventeen essays on the Old Testament and the history of ancient Israel and commemorates the sixtieth birthday of John H. Hayes, Professor of Old Testament at Candler School of Theology (Emory University). All the contributors were Hayes's doctoral students at Emory, and their essays cover a wide range of topics that reflect their teachers own scholarly interests-from historical geography and the history of ancient Israel to religion, theology, and the exegesis of individual texts. The methodologies employed are equally diverse: some focus on text-critical or form-critical issues, while others are essentially historical, rhetorical, or literary critical studies. Three essays are devoted to the Pentateuch, three to the Historical Books, four to the Prophets, and seven to the history of ancient Israel. A bibliography of Professor Hayes's publications is also included.

In the years since Stalin's death, his profound influence upon the historical development of Communism has remained elusive and in need of interpretation. Stalinism, as his system has become known, is a phenomenon which embraced all facets of political and social life. While its effect upon the Soviet Union and other nations today is far less than it was while Stalin lived, it is by no means dead.In this landmark volume some of the world's foremost scholars of the subject, in a concerted group inquiry, present their interpretations of Stalinism and its influence on all areas of comparative Communist studies from history and politics to economics, sociology, and literary scholarship. The studies contained in this volume are an outgrowth of a conference on Stalinism held in Bellagio, Italy, sponsored by the American Council of Learned Societies.In his major contribution to this book, Leszek Kolakowski calls Stalinism "a unified state organism facing atom-like individuals." This extraordinary volume, augmented by a revealing new introduction by the editor, Robert C. Tucker, can be seen as amplifying that remark nearly a half century after the death of Joseph Stalin himself.Contributors to this work are: Wlodzimierz Brus, Katerina Clark, Stephen F. Cohen, Alexander Erlich, Leszek Kolakowski, Moshe Lewin, Robert H. McNeal, Mihailo Markovic, Roy A. Medvedev, T. H. Rigby, Robert Sharlet, and H. Gordon Skilling. Robert C. Tucker's principle work on Stalin has been described by George F. Kennan as "the most significant single contribution made to date, anywhere, to the history of Soviet power."

Frank H. Knight (1885-1972) was a central figure—many say the dominant influence—in the development of the "Chicago School of Economics" at the University of Chicago in the 1930s and 1940s, where he taught future Nobel laureates Milton Friedman, James Buchanan, George Stigler, and many other notable scholars. It was Knight's embedded skepticism about the reach of economic knowledge that set the stage for the laissez-faire economics that matured at the University in the 1950s and 1960s. But as important as Knight's technical economic contributions were, he never strayed far from his broad philosophical interests and concern for the state of modern liberal democracy. Ross B. Emmett's selection of Knight's essays is the first to offer a comprehensive picture of the work of this notable social scientist over the span of his career. Included are not only Knight's most influential writings, but also a number of uncollected papers which have not previously been widely accessible. These essays illustrate Knight's views on the central debates regarding economics, social science, ethics, education, and modern liberalism. Volume 1: "What is Truth" in Economics? contains fifteen of Knight's papers up through 1940. Volume 2: Laissez Faire: Pro and Con includes fourteen of Knight's papers from 1940 through 1967, including "Socialism: The Nature of the Problem" and "The Sickness of Liberal Society." These twenty-nine essays together stand not only as a monument to one of economics' most significant and original thinkers, but will also serve as an invaluable resource for economists, philosophers, and political scientists interested in the development of the western liberal tradition.

Interpreting the Labour Party consists of twelve essays on the principal thinkers and schools of thought concerned with the political and historical development of the Labour Party and Labour movement. The essays are written by contributors who have devoted many years to the study of the Labour Party, the trade union movement and the various ideologies associated with them. The book begins with an in-depth analysis of how to study the Labour Party, and goes on to examine key periods in the development of the ideologies to which the party has subscribed. Each chapter situates its subject matter in the context of a broader intellectual legacy, including the works of Sidney and Beatrice Webb, Theodore Rothstein, Stuart Hall and Samuel Beer, among others.

This book relates Kant's work to the historical context of his predecessors.

Debates on Stalinism introduces major debates about Stalinism during and after the Cold War. Did 'Stalinism' form a system in its own right or was it a mere stage in the overall development of Soviet society? Was it an aberration from Leninism or the logical conclusion of Marxism? Was its violence the revenge of the Russian past or the result of a revolutionary mindset? Was Stalinism the work of a madman or the product of social forces beyond his control? The book shows the complexities of historiographical debates, where evidence, politics, personality, and biography are strongly entangled. Debates on Stalinism allows readers to better understand not only the history of history writing, but also contemporary controversies and conflicts in the successor states of the Soviet Union, in particular Russia and Ukraine.

" 22 contributors explore a wide range of experiences " in this " illuminating, invaluable " anthology edited by the author of Female Chauvinist Pigs (Publishers Weekly). Writing an essay is like catching a wave, posits guest editor Ariel Levy. To catch a wave, you need skill and nerve, not just moving water. The writers featured in this volume are certainly full of nerve, and have crafted a wide range of pieces awash in a diversity of moods, voices, and stances. Leaving an abusive marriage, parting with a younger self, losing your sanity to Fitbit, and even saying goodbye to a beloved pair of pants are just some of the experience probed by essays that are unified in the daring of their creation. As Levy notes, Writing around an idea you think is worthwhile—an idea you suspect is an insight—requires real audacity. " The Best American Essays 2015 includes entries by Hilton Als, Roger Angell, Justin Cronin, Meghan Daum, Anthony Doerr, Margo Jefferson, David Sedaris, Zadie Smith, Rebecca Solnit and others.
