Also, how does using a "Y" compare to just running two ...

In this book, scholars and artists explore the relation between electronic music and bodily expression from perspectives including aesthetics, philosophy of mind, phenomenology, dance and interactive performance arts, sociology, computer music and sonic arts, and music theory, transgressing disciplinary boundaries and established beliefs. The historic decoupling of action and sound generation might be seen to have distorted or even effaced the

expressive body, with the retention of performance qualities via recoupling not equally retaining bodily expressivity. When, where, and what is the body expressed in electronic music then? The authors of this book reveal composers', performers', improvisers' and listeners' bodies, as well as the works' and technologies' figurative bodies as a rich source of expressive articulation. Bringing together humanities' scholarship and musical arts contingent upon new media, the contributors offer inspiring thought and critical reflection for all those seriously engaged with the aesthetics of electronic music, interactive performance, and the body's role in aesthetic experience and expression. Performativity is not only seen as being reclaimed in live electronic music, interactive arts, and installations; it is also exposed as embodied in the music and the listeners themselves.

to listeners. The robust website (www.routledge.com/cw/toole) is the perfect companion to this necessary resource.

The Audio Expert is a comprehensive reference that covers all aspects of audio, with many practical, as well as theoretical, explanations. Providing in-depth descriptions of how audio really works, using common sense plain-English explanations and mechanical analogies with minimal math, the book is written for people who want to understand audio at the deepest, most technical level, without needing an engineering degree. It's presented in an easy-to-read, conversational tone, and includes more than 400 figures and photos augmenting the text. The Audio Expert takes the intermediate to advanced recording engineer or audiophile and makes you an expert. The book goes far beyond merely explaining how audio "works." It brings together the concepts of audio, aural perception, musical instrument physics, acoustics, and basic electronics, showing how they're intimately related. Describing in great detail many of the practices and techniques used by recording and mixing engineers, the topics include video production and computers. Rather than merely showing how to use audio devices such as equalizers and compressors, Ethan Winer explains how they work internally, and how they are spec'd and tested. Most explanations are platform-agnostic, applying equally to Windows and Mac operating systems, and to most software and hardware. TheAudioExpertbook.com, the companion website, has audio and video examples to better present complex topics such as vibration and resonance. There are also videos demonstrating editing techniques and audio processing, as well as interviews with skilled musicians demonstrating their instruments and playing techniques.

This visually stunning tour through this Grade-A Texas gearhead's weird, wild life, vintage and way-out custom guitars, and influential hot rods and custom cars is mandatory education. As with many rockers, Billy F Gibbons' jones for hot rods and customs is the stuff of legend. But beyond

this bona fide bluesman's mastery of the six-string and unrepentant love for internal combustion is a noted collector whose own designs have manifested themselves in hundreds of mind-bending cars and guitars. This is the definitive and official record of that genius.

West Hill Ward in Wandsworth straddles the historic areas of Putney, Southfields and Wimbledon in southwest London. It has undergone two major transformations--around 1850 and 1950--which transformed it from landscaped woodland to an area of large villas set in extensive grounds to densely populated inner city with heavy social housing. This short account seeks to trace those changes through the stories of the houses, their occupants, and their occupants' friends and neighbours.
